

Website Proposal

Two build tiers, priced separately, plus optional add-ons — choose the level that fits the launch.

Both tiers are fully built and live for review at the links below. Tier 1 is a complete, production-ready luxury travel site with cinematic scroll animation throughout. Tier 2 builds on everything in Tier 1 and adds a distinct, more elaborate flagship experience — an animated flight-path journey across a live map, bespoke layouts per destination, and an interactive boarding-pass enquiry form.

TIER 1 — STANDARD The Signature Site Live preview yourdomain.com From AED 32,000 <i>One-time build cost. Final quote confirmed after scope sign-off.</i> — Full-bleed cinematic video hero with parallax and letterbox reveal — GSAP + Lenis scroll choreography throughout, mobile-optimized — Horizontal pin-scroll destinations gallery (native swipe on mobile) — Pinned cinematic "Chapters" crossfade section — Illustrated gold-line "Route" map with scroll-drawn flight path — Custom cursor, count-up stats, velocity-aware marquee — Enquiry form with interest tagging — Fast, lightweight build (no bloated page-builder)	TIER 2 — PREMIUM The Flagship Experience Live preview yourdomain.com/tier2 From AED 78,000 <i>Includes everything in Tier 1. One-time build cost, confirmed after scope sign-off.</i> — Everything included in Tier 1, as its foundation — One continuous animated flight path across the entire journey — Live dotted world-map background with landing "pulse" bursts — Four destinations, each with its own distinct visual layout — Gold/white theme that switches per destination on arrival — Interactive boarding-pass enquiry form with tear-off submit animation — Positioned as the top-tier, most memorable option to present to VIP clients
--	---

Note: Tier 2's price reflects the added engineering — a second full animation system, custom canvas rendering, and per-destination bespoke layouts — on top of the Tier 1 build it's based on.

OPTIONAL ADD-ONS

Extend either tier

These sit on top of either tier and can be added at launch or later. Priced separately since scope varies by feature depth.

Add-on	What it does	Starting price
AI Concierge / Chat Assistant	A trained assistant that answers guest questions and routes serious enquiries — on-brand tone, available 24/7.	From AED 14,000 + usage costs
Sanity CMS Integration	Edit destinations, journal entries, and imagery yourselves without touching code — structured content model built around the site's design.	From AED 16,000
Email Support & Automation	Enquiry form wired to real inbox routing, branded auto-replies, and internal notification workflows.	From AED 4,500
Arabic / English Toggle	Full bilingual site with RTL layout support — common expectation for the UAE market.	From AED 11,000
Booking & Payment Integration	Deposit collection or full booking flow tied to your payment provider of choice.	From AED 22,000
SEO & Analytics Package	Technical SEO pass, structured metadata, and a dashboard for traffic and enquiry tracking.	From AED 6,500
Care & Content Retainer	Ongoing updates, monitoring, and small content changes handled monthly.	From AED 2,200 /mo

All figures above are starting estimates for a UAE-based engagement, intended as a starting point for discussion rather than a fixed quote — final pricing is confirmed once scope, content, and timeline are agreed. Both tiers are live for review now; links will be updated to the production domain at launch.
