

Statement of Work

Website design & development — scope, timeline, and terms of engagement.

Client	The Retreat Collection
Project	Website design & development — Tier 1 and Tier 2
Prepared by	_____
Date	_____

1. Project Overview

This Statement of Work ("SOW") defines the scope, deliverables, timeline, pricing, and terms for the design and development of The Retreat Collection website. The engagement covers two build tiers, priced and delivered independently — Tier 1 is a complete, launch-ready site; Tier 2 is an optional, more elaborate flagship experience built on top of Tier 1. Both are live for review during this engagement.

Tier 1 preview	darkviolet-mouse-380960.hostingersite.com
Tier 2 preview	darkviolet-mouse-380960.hostingersite.com/tier2

2. Scope of Work

2.1 — Tier 1: The Signature Site

A complete, production-ready website built with a custom animation system throughout — not a page-builder template. Includes:

- Full-bleed cinematic video hero with parallax depth and letterbox reveal on load
- Custom scroll choreography (GSAP + Lenis smooth scroll) across every section, tuned for both desktop and mobile
- Horizontal pin-scroll destinations gallery with native swipe support on touch devices
- Pinned cinematic "Chapters" section with crossfade transitions
- Illustrated gold-line "Route" map section with a scroll-drawn flight path animation
- Custom cursor, animated count-up statistics, velocity-aware marquee text
- Enquiry form with interest tagging, wired to a working email destination
- Fully responsive layout: mobile, tablet, and desktop breakpoints
- On-page SEO basics: meta titles/descriptions, semantic markup, sitemap
- Cross-browser testing on current Chrome, Safari, and Firefox

2.2 — Tier 2: The Flagship Experience (optional add-on)

Everything in Tier 1, plus a second, more elaborate presentation layer built specifically for high-value client pitches:

- One continuous, scroll-scrubbed flight path animation connecting every destination on a single journey
- Live dotted world-map canvas background with idle shimmer and "landing pulse" burst effects
- Four destinations, each with its own distinct visual layout and composition — no two look alike
- Gold/white theme that switches per destination on arrival, including map, plane, and typography accents
- Interactive boarding-pass-styled enquiry form with a tear-off submit animation
- Positioned and built as the top-tier, most memorable version of the site for VIP-facing presentations

2.3 — Technical Foundation

Built on React (Vite) with TypeScript, Tailwind CSS, and GSAP/ScrollTrigger for animation. Static-hosted output — no CMS or backend included in either tier unless added via the Sanity CMS add-on below. Source code is organized into components for maintainability and future extension.

3. Timeline

The live previews linked in Section 1 are a working prototype, built ahead of this agreement to demonstrate the actual design and animation direction — not a mockup. The schedule below covers turning that prototype into the final production build: integrating your final content, connecting your domain, incorporating your revisions, and full QA.

Phase	Dates	Covers
Discovery & content intake	Aug 24 – Aug 28	Final copy, imagery, brand assets, domain access
Tier 1 finalization	Aug 29 – Sept 5	Real content integrated into the production build
Tier 2 finalization	Sept 6 – Sept 13	Real content integrated into the flagship build
Review & revisions	Sept 14 – Sept 17	Client feedback round, per Section 7
QA & launch	Sept 18 – Sept 20	Cross-browser/device testing, domain go-live
Final Production Delivery	September 20, 2026	

Dates assume kickoff (signature + deposit) and content delivery on schedule above; delays in either will shift the final delivery date by the same duration, per Section 8.

4. Pricing & Payment Schedule

Standard Rate reflects the market value of the scope in Section 2. Founding Client Rate is a limited-time rate offered in exchange for portfolio usage rights (Section 10) and a testimonial upon launch — it is not the ongoing rate for future phases, revisions beyond Section 7, or referred projects.

Item	Description	Standard Rate	Founding Client Rate
Tier 1 — The Signature Site	Full build, as scoped in 2.1	AED 32,000	AED 9,000
Tier 2 — The Flagship Experience	Add-on to Tier 1, as scoped in 2.2	AED 78,000	AED 13,000
Combined (Tier 1 + Tier 2)	Both tiers delivered together	AED 110,000	AED 22,000

Payment terms: 50% deposit due upon signature of this SOW to begin work; remaining 50% due prior to final handover and domain launch. Invoices are payable within 7 days via bank transfer. Prices above are one-time build costs and exclude the add-ons in Section 5, domain registration, and hosting costs.

5. Optional Add-ons

Available on top of either tier, at launch or added later. Billed separately from the core build.

Add-on	What it does	Price
--------	--------------	-------

AI Concierge / Chat Assistant	Trained assistant that answers guest questions and routes serious enquiries.	AED 3,500 + usage
Sanity CMS Integration	Edit destinations, journal entries, and imagery without touching code.	AED 3,000
Email Support & Automation	Enquiry form wired to inbox routing, branded auto-replies, notifications.	AED 1,200
Arabic / English Toggle	Full bilingual site with RTL layout support.	AED 2,500
Booking & Payment Integration	Deposit collection or full booking flow via your payment provider.	AED 4,500
SEO & Analytics Package	Technical SEO pass, structured metadata, traffic/enquiry dashboard.	AED 1,800
Travel Journal / Blog Section	CMS-driven blog for guides and stories, built for SEO content.	AED 2,200
Guest Reviews & Testimonials Module	Curated review carousel, pulled from your own database or Google.	AED 1,200
Newsletter & Email Marketing Integration	Signup capture wired to Mailchimp/Klaviyo with a branded welcome flow.	AED 1,500
Marketing Email Campaign Support & Automation	Ongoing campaign builds, seasonal sends, and automated follow-up sequences beyond the initial signup flow.	AED 2,000 + AED 600 /mo
WhatsApp Business Integration	Direct enquiry button linked to WhatsApp Business — common for UAE travel bookings.	AED 600
Multi-Currency Display	Auto-shows prices in AED, USD, EUR, GBP by visitor region.	AED 1,800
PWA (Installable App) Support	Home-screen install, offline caching, and app-like navigation — no native app development required.	AED 2,800
Additional Destination Page	One extra fully-designed destination page beyond the initial set.	AED 1,200 /page
Care & Content Retainer	Ongoing updates, monitoring, and small content changes, monthly.	AED 800 /mo

5.1 — Recommended for This Launch

If budget only allows a few, these are the ones most likely to move the needle for a UAE-based travel startup specifically:

— **WhatsApp Business Integration** — Most travel enquiries in the UAE happen over WhatsApp — this closes the gap between browsing and booking.

— **Newsletter & Email Marketing Integration** — Captures visitors who aren't ready to enquire yet, so paid traffic isn't lost the moment it leaves the page.

— **SEO & Analytics Package** — You'll want to know what's actually working before spending further on ads or content.

— **PWA (Installable App) Support** — Lets repeat guests add the site to their home screen like an app — a nice touch for a travel brand, without the cost of native app development.

6. Deployment & Third-Party Subscriptions

These are ongoing services billed directly by their providers at the provider's own rate — they are not part of the developer's fees above and are not marked up. The developer will assist with setup and initial configuration as part of the build; the subscriptions themselves are opened and paid for in the client's own name so the client retains full ownership and control of every account.

Item	Example provider	Typical rate
Domain registration	Hostinger / GoDaddy	AED 40–80 /yr
Web hosting	Hostinger Business/Cloud	AED 500–1,200 /yr
SSL certificate	Usually bundled with hosting	Free–AED 150 /yr
Business email	Google Workspace	AED 20–35 /user/mo
CMS plan (if Sanity add-on)	Sanity.io	Free tier, then ~AED 365 /mo
AI Concierge usage (if added)	OpenAI / Anthropic API	~AED 200–800 /mo, by traffic
Payment gateway fees (if added)	Stripe / PayTabs / Telr	~2.5–3.5% /transaction
Video / CDN hosting (if heavy video)	Cloudflare Stream / Mux	AED 50–300 /mo, by usage

Rates above are indicative, based on current public provider pricing, and will vary with actual usage and the plan tier chosen. The client is billed by each provider directly.

7. Revisions Policy

Two rounds of revisions are included per tier, covering layout, copy placement, imagery, and color/style adjustments within the established design system. Revisions must be consolidated into a single list per round. Structural changes beyond the agreed scope (new sections, new page templates, a different animation system) are treated as new work and quoted separately. Additional revision rounds beyond the two included are billed at AED 300/hour.

8. Client Responsibilities

- Provide final copy, imagery, and video assets in usable resolution before the build phase begins
- Provide brand assets already in hand (logo, color codes, fonts) at kickoff
- Respond to review requests and provide consolidated feedback within 3 business days to keep the timeline on track
- Provide access to domain/DNS and hosting account (or confirm hosting arrangement) ahead of launch
- Designate a single point of contact authorized to approve deliverables

Delays in providing the above will shift the delivery timeline in Section 3 by the same duration.

9. Out of Scope

- Copywriting or content creation (text, photography, videography)
- Paid advertising, ad campaign setup, or social media management
- Ongoing hosting, domain renewal, or third-party API/service costs (see Section 6)
- Maintenance, monitoring, or content updates after launch, beyond the optional Care & Content Retainer

- Custom backend systems or databases beyond the optional CMS/booking add-ons
- Multi-language support beyond the optional Arabic/English toggle

10. Ownership & IP

Upon receipt of full and final payment, all custom code, design assets, and content produced specifically for this project transfer to the client. Third-party libraries and frameworks used in the build remain under their respective open-source licenses. The developer retains the right to display the completed work in a portfolio and case studies unless otherwise agreed in writing.

11. Warranty & Support Window

A 30-day warranty period follows launch, covering bug fixes for defects in the delivered build at no additional cost. This does not cover new features, content changes, or issues introduced by third-party edits to the site after handover. Ongoing support beyond this window is available via the Care & Content Retainer in Section 5.

12. Termination

Either party may terminate this engagement with written notice. Work completed up to the point of termination is billed pro-rata against the deposit paid; any balance owed for work delivered but not yet invoiced becomes due immediately. Deposits are non-refundable once work has commenced.

13. Acceptance

By signing below, both parties agree to the scope, timeline, pricing, and terms outlined in this Statement of Work.
